Reach by Post Type

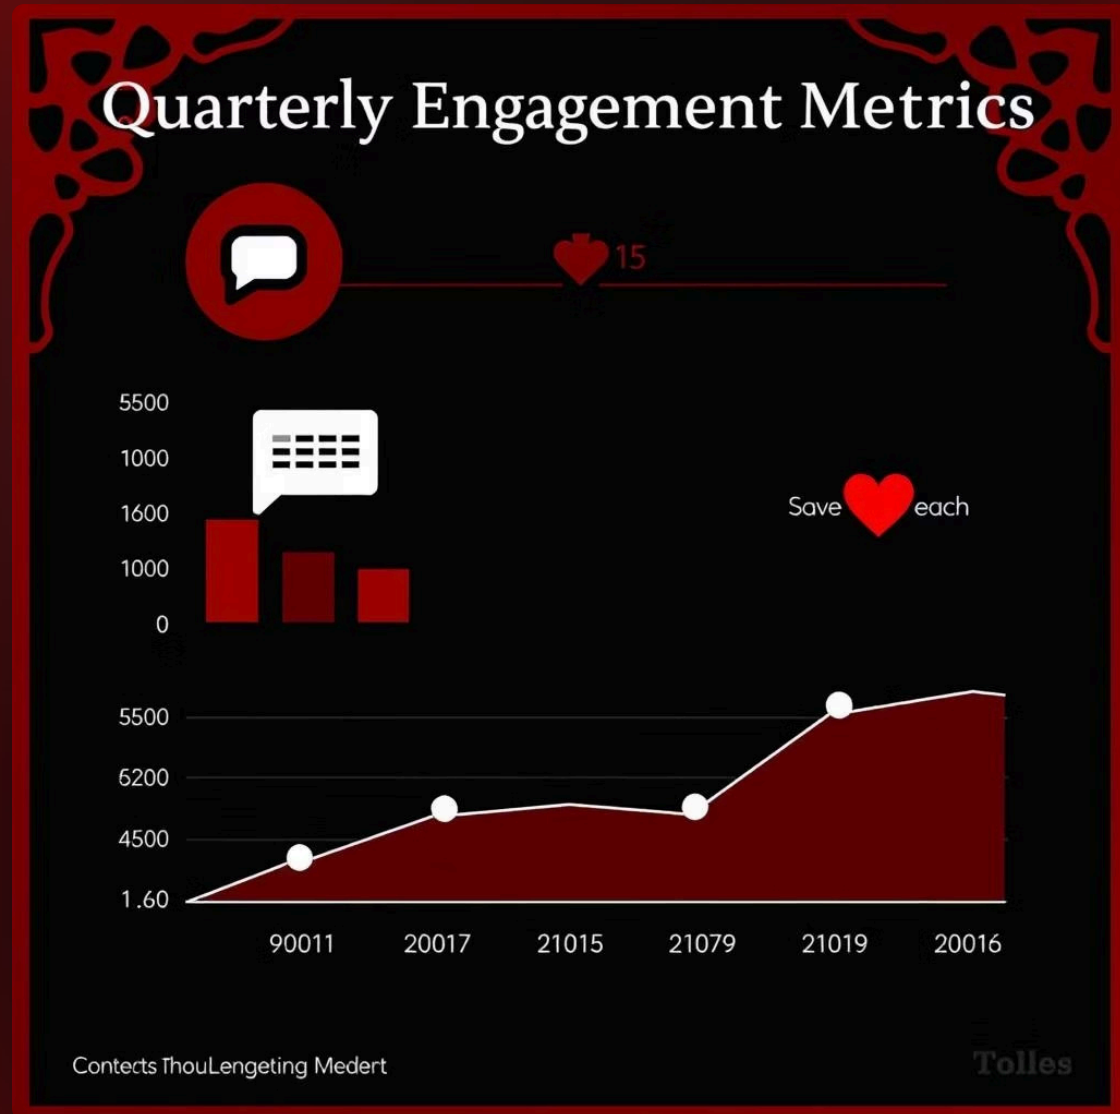

Reach percentage distribution

- One of the most telling metrics—reach—was broken down by post type. This shows which formats are delivering visibility, and where more effort might be worthwhile."

Comments & Saves by Quarter

Q1–Q3 engagement analysis

"I segmented engagement metrics like comments and saves by quarter. This quarterly view provides a more strategic lens on audience interaction."

Top Follower Growth Days

- **Monthly Peaks:** Identified top 3 days each month with highest new followers.
- **Growth Drivers:** These spikes indicate successful posts or campaigns.
- **Actionable Insights:** Focus strategies on replicating content from these key days.

Stored Procedure for Weekly Shares

This dynamic report tracks total shares by post type each week.

The procedure accepts a week number input for flexible, ongoing analysis.

```

-- Stored Procedure: Weekly Shares Report
-- Accepts week number input
-- Tracks total shares by post type each week

-- Example SQL (Slick)
SELECT
    post_type,
    SUM(shares) AS total_shares
FROM
    shares_data
WHERE
    week_number = 1234
GROUP BY
    post_type
ORDER BY
    total_shares DESC

```

Key Takeaways

Content Diversity

Multiple post types drive engagement

Timing Matters

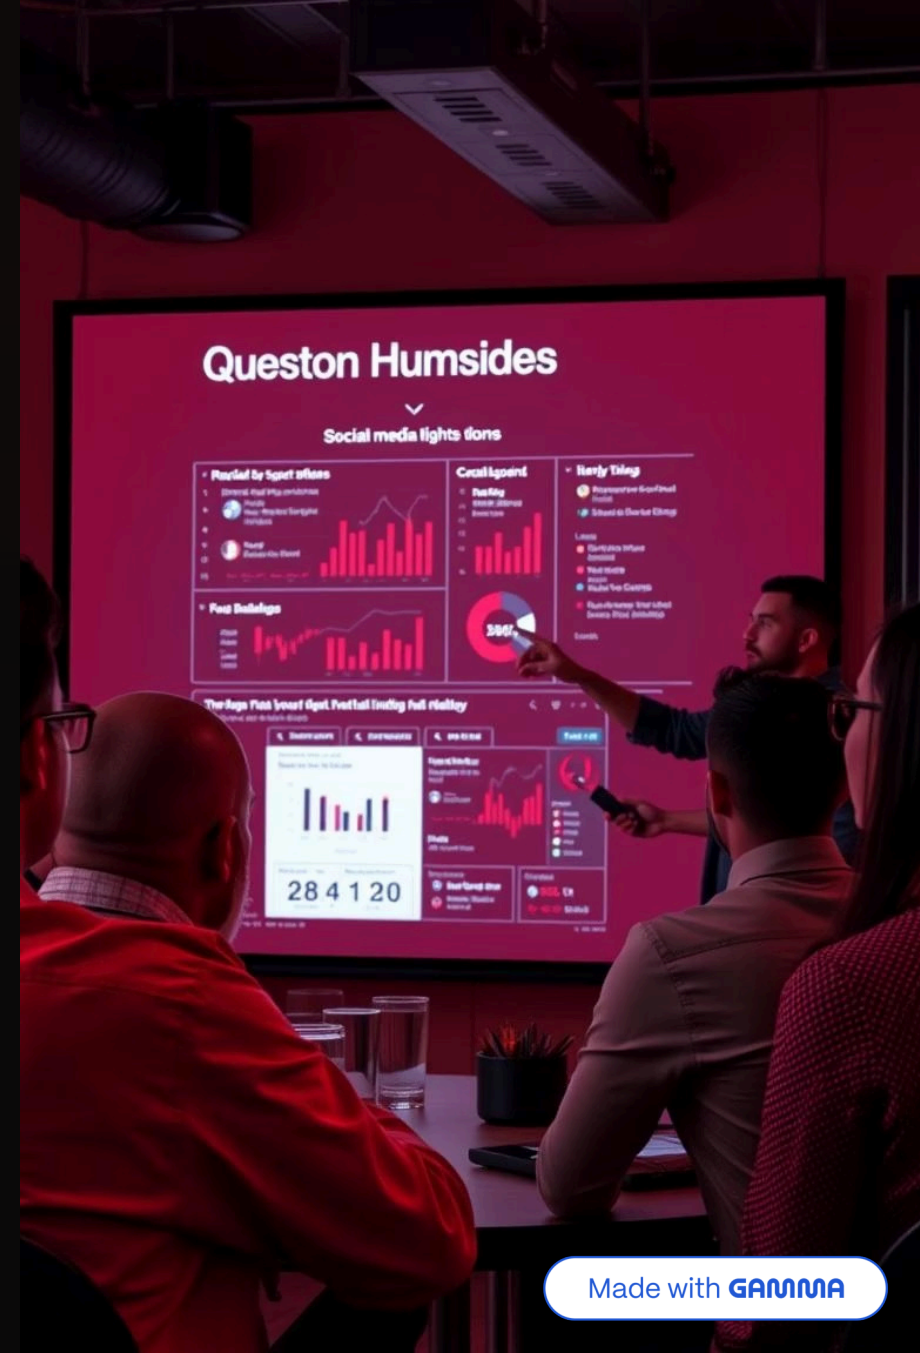

Weekend posts show unique patterns

Growth Trajectory

Consistent monthly follower increase

Category Performance

Product reviews generate most likes

Thank You

Thanks for your time and attention today.

I'm happy to discuss the analysis or metrics in detail.

Let's leverage these insights to build a smarter content strategy.

Open Discussion

Questions and deeper dives into metrics welcome.

Next Steps

Use data-driven insights for content optimization.

Collaboration

Partner to refine and scale content strategies.
